> SOFTWARE AUTOMATION ENGINEER 3scale API Management Platform

Job ID: 55702 | Location: Brno, Czech Republic

Red Hat's Middleware Quality Engineering team is looking for a Software Automation Engineer with a passion for open source software to join us in Brno.

What you'll do

In this role, you will make a difference in products used by millions of people around the world as you help improve our Red Hat 3scale API Management Platform, a leader in Gartner's 2016 Magic Quadrant for Full Life Cycle API Management. You'll be responsible for all aspects of quality, including designing test plans, extending existing automation frameworks, and developing new automated tests for both back and front ends.

Technologies you'll work with

- > Ansible
- > OpenShift Container Platform
- > Docker
- > Kubernetes
- > Ruby

Join us

Part-timers are welcome.
